Objective

Position as Web Developer or Systems Programmer in New York City

Education

- 1999-2003 Columbia University, School of Engineering
- Pursued Bachelor of Science degree in Computer Science
 - Coursework in Operating System Development, Database Systems, Compiler Development, Networking, Computer Architecture, Natural Language Processing, Robotics, Computer Vision, Statistics, History, and Economics

Work History

- 2003-2006 United States Army, Fort Benning, GA
Infantry Soldier
- Completed basic and advanced training. Promoted to rank of Specialist. Recognized on numerous occasions for outstanding performance.
 - Yearlong combat tour to Iraq. Participated in patrols and raids, worked on a personal security detail for a battalion commander, and logged hundreds of hours of guard duty and HMMWV driving time.

- 2000-2003 Columbia University School of Engineering, New York, NY
Web Developer
- Wrote and deployed a web-based evaluation system for engineering course evaluations. Primary features were a WYSIWYG survey editor, a graphical reporting system, an email reminder system, and various administrative interfaces. Written in PHP, SQL, Javascript, and PL/pgSQL (Postgres procedural query language) in approximately 20,000 lines of code.
 - Other smaller projects include a web crawler written in Delphi, a COM component used for authentication written with ATL in C++, and some additional web development with PHP, Perl, and MySQL.

Past jobs include temp work for Kelly Services and JFC staffing, phone tech support for Earthlink, electronics sales at Montgomery Ward's, and tech support and computer assembly for PA Network, a local ISP in my hometown of Harrisburg, PA.

Open source experience includes lead developer role for ViewVC project and more minor contributions to Subversion and GCC projects.

Skills

High Proficiency	C++ Language (STL, generic programming), Python, PHP, Javascript, DHTML, SQL
Medium Proficiency	Win32 Programming (systems, GDI, windowing, COM), Python, Borland Delphi (GUI, Object Pascal), Java (Swing, Servlets, Sockets, JDBC)
Basic Familiarly	Perl, ASP, ASP.NET, C#, Visual Basic
